1 2	Cons	sider the following mystery method.
point	•	1 → public String mystery(String dna) {
	3	<pre>int pos = dna.indexOf("T"); int count = 0; int startPos = 0; String newDna = "";</pre>
	-	6 + if (pos == -1) { 7 return dna;
	10	
	13 13 13	<pre>startPos = pos+1; pos = dna.indexOf("T", startPos);</pre>
	1! 16	6 }
	15	newDna = newDna + dna.substring(startPos); return newDna;
	Whic	th of the following best describes what it does?
		The method mystery is given a string and it returns a string which is the same
		string but with all the T's removed. The method mystery is given a string and it returns a string which is the same
		string but with the each T each replaced with two T's.
		The method mystery is given a string and it returns a string which is the same string but with the first three T's removed.
		The method mystery is given a string and it returns a string which is three copies of the original string.
		The method mystery is given a string and it returns a string which is the same
		The method mystery is given a string and it returns a string which is the same string but with the first three T's each replaced with two T's.
2	Use t	string but with the first three T's each replaced with two T's.
